## Field Visit Report

Department of Zoology arranged one day **field visit** (field study) on **19<sup>th</sup> October 2022**. More than Eighty-seven students of B.Sc. V<sup>th</sup> Semester along with 3 subject teachers visited nearby rice fields to study the insect pests and their natural enemies (bio-agents) in the rice ecosystem. Students observed different insects in their natural habitat and collected by using insect collecting net. They brought insects in the zoology laboratory, killed them with ether and chloroform and preserved in boxes by drying in oven set at 45 degrees centigrade.
